Final vs finally vs finalize

Final		Finally	Finalize
Variable	final int a = 10;	Finally{ }	Finalize method : -
Method	@override	try{	Garbage collector distroy
Class	extends	- - - - - -	the unused object, the first check
		- - - - - -	the object are allocate of other
		}	source, they first deallocate first,
		catch()	now the distroy the object.
		{	
		- - - - - -	finalize()
		}	{
		finally	db.close();
		{	n.close();
		- - - - - -;	}
		Clean up code;	
		}	
1. final is keyword.		1. finally is a block.	1. finalize is a method.
2. it is applicable for variable, method & classes.		2. it is always execute weather the exception is handle by user or not.	2. it is used to deallocate the resources which is allocated by unused object.
